

Annex 6 referred to in Chapter 8
Schedules of Specific Commitments
in relation to Article 99

Part 1
Schedule of Japan

Explanatory Notes

1. Alphabets indicated against individual sectors or sub-sectors and numbers in brackets are references to the Services Sectoral Classification List (GATT Document MTN.GNS/W/120, dated 10 July 1991) and the Provisional Central Product Classification (Statistical Papers Series M No. 77, Department of International Economic and Social Affairs, Statistical Office of the United Nations, New York, 1991). These alphabetical and numerical divisions are indicated to enhance the clarity in the description of specific commitments, but shall not be construed as being a part of the specific commitments.

2. The scheduling of specific commitments follows the Guidelines for the Scheduling of Specific Commitments (WTO Document S/L/92, dated 28 March 2001). The Guidelines shall not, however, be construed as being legally binding.

3. The modes of supply 1), 2), 3) and 4) indicated in this Schedule correspond respectively to the supply of services defined in subparagraphs (v)(i), (ii), (iii) and (iv) of Article 95.

4. The entry "Unbound*" means unbound due to lack of technical feasibility. The entry of "SS" in a sector or sub-sector under paragraph 3 of Article 99 shall not prevent Japan from adopting nor maintaining any measure with respect to the modes where "Unbound*" is entered.

5. The use of "***" against individual CPC codes indicates that the specific commitment for that code does not extend to the total range of services covered under that code.

6. Measures affecting (a) passenger transport services by air; (b) freight transport services by air; and (c) rental/leasing services of aircraft with crew/operator are not listed in this Schedule, as these are measures affecting traffic rights or measures affecting services directly related to the exercise of traffic rights to which Chapter 8 does not apply. The commitment for freight transport agency services does not include freight forwarding services by air transport services.

JAPAN: ADDITIONAL COMMITMENTS

Scope

The following are definitions and principles on the regulatory framework for the basic telecommunications services.

Definitions

- (a) the term "telecommunications" means the transmission and reception of signals by any electromagnetic means;
- (b) the term "public telecommunications transport service" means any telecommunications transport service required, explicitly or in effect, by Japan to be offered to the public generally. Such services may include, *inter alia*, telegraph, telephone, telex, and data transmission typically involving the real-time transmission of customer-supplied information between two or more points without any end-to-end change in the form or content of the customer's information;
- (c) the term "public telecommunications transport network" means the public telecommunications infrastructure which permits telecommunications between and among defined network termination points;
- (d) the term "essential facilities" means facilities of a public telecommunications transport network or service that:
 - (i) are exclusively or predominantly provided by a single or limited number of suppliers; and
 - (ii) cannot feasibly be economically or technically substituted in order to provide a service;
- (e) the term "major supplier" means a supplier that has the ability to materially affect the terms of participation having regard to price and supply in the relevant market for basic telecommunications services as a result of:
 - (i) control over essential facilities; or
 - (ii) use of its position in the market;
- (f) the term "facilities-based suppliers" means telecommunications carriers who establish telecommunications circuit facilities;

(g) the term "services-based suppliers" means telecommunications carriers other than the telecommunications carriers defined by subparagraph (f).

1. Competitive Safeguards

1.1 Prevention of Anti-competitive Practices in Telecommunications

Appropriate measures shall be maintained for the purposes of preventing suppliers, who alone or together are a major supplier, from engaging in or continuing anti-competitive practices.

1.2 Safeguards

The anti-competitive practices referred to in subparagraph 1.1 shall include in particular:

- (a) engaging in anti-competitive cross-subsidization or pricing services in a manner that gives rise to unfair competition;
- (b) discriminating specific persons unfairly in providing telecommunications services;
- (c) using information obtained from competitors with anti-competitive results; and
- (d) not making available to other service suppliers on a timely basis technical information about essential facilities and commercially relevant information which are necessary for them to provide services.

2. Interconnection

2.1 Interconnection to be Ensured

Interconnection shall be ensured between a facilities-based supplier and any other facilities-based supplier or a services-based supplier to the extent provided for in its laws and regulations.

2.2 Interconnection with Major Suppliers

Interconnection with a major supplier shall be ensured at any technically feasible point in the network. Such interconnection is provided:

- (a) under non-discriminatory terms, conditions (including technical standards and specifications) and rates and of a quality no less favourable than that provided for its own like services, for like services of non-affiliated service suppliers or of its subsidiaries or other affiliates;
- (b) in a timely fashion, on terms, conditions (including technical standards and specifications) and cost-oriented rates that are transparent, reasonable, having regard to economic feasibility, and sufficiently unbundled (Note) so that the service supplier need not pay for network components or facilities that it does not require for the services to be provided; and

(Note) "Sufficiently unbundled" network components or facilities include unbundled local loop (including line sharing).
- (c) upon request, at points in addition to the network termination points offered to the majority of users, subject to charges that reflect the cost of construction of necessary additional facilities.

2.3 Co-Location, etc.

It shall be ensured that a major supplier is required to allow other service suppliers who interconnect with the major supplier:

- (a) to locate their equipment which is essential for interconnection within the major supplier's buildings; or
- (b) to install their cables and lines which are essential for interconnection within the major supplier's buildings, conduits, cable tunnels or telephone poles,

where physically feasible and where no practical or viable alternatives exist, in order to interconnect smoothly with the essential facilities of the major supplier.

2.4 Interconnection Pursuant to an Approved Reference Interconnection Offer

It shall be ensured that major suppliers are required to provide a reference interconnection offer for approval by the relevant regulatory authorities. The reference interconnection offer shall be consistent with the principles of paragraph 1 and shall contain written statements of the charges and conditions on which a major supplier will interconnect with other service suppliers. At a minimum, the reference interconnection offer shall be required to contain the following:

- (a) a list and description of the interconnection-related services offered, the terms and conditions for such services, the operational and technical requirements, and the procedures or processes that will be used to order and provide such services;
- (b) a list of cost-oriented rates that a major supplier offers for all its interconnection-related services. Where feasible, the major supplier shall be required to use an established methodology based on incremental forward-looking economic cost;
- (c) standard periods between the dates of request and commencement which are stipulated in a clear manner and are reasonable; and
- (d) a statement regarding the duration of the proposed interconnection agreement, if it is fixed.

2.5 Section 2.2, 2.3 and 2.4 are applied only to a major supplier which has control over essential facilities.

2.6 Public Availability of the Procedures for Interconnection Negotiations

It shall be ensured that the procedures applicable for interconnection to a major supplier are made publicly available.

2.7 Transparency of Interconnection Arrangements

It shall be ensured that a major supplier makes publicly available either its interconnection agreements or reference interconnection offer.

2.8. Interconnection Dispute Settlement

A service supplier requesting interconnection with a major supplier shall have recourse, either:

- (a) at any time; or
- (b) after a reasonable period of time which has been made publicly known,

to an independent domestic body, which may be a regulatory body as referred to in paragraph 5, to resolve disputes regarding appropriate terms, conditions and rates for interconnection within a reasonable period of time, to the extent that these have not been established previously.

3. Universal Service

Japan has the right to define the kind of universal service obligation it wishes to maintain. Such obligations shall not be regarded as anti-competitive per se, provided that they are administered in a transparent, non-discriminatory and competitively neutral manner and are not more burdensome than necessary for the kind of universal service defined by Japan.

4. Public Availability of Licensing Criteria

- (a) Where a licence is required, the following shall be made publicly available:
 - (i) all the licensing criteria and the period of time normally required to reach a decision concerning an application for a licence; and
 - (ii) the terms and conditions of individual licences.
- (b) The reasons for the denial of a licence shall be made known to the applicant upon request.

5. Independent Regulators

The regulatory body shall be separate from, and not accountable to, any supplier of telecommunications services. The decisions of and the procedures used by regulators shall be impartial with respect to all market participants.

6. Allocation and Use of Scarce Resources

Any procedures for the allocation and use of scarce resources, including frequencies, numbers and rights of way, shall be carried out in an objective, timely, transparent and non-discriminatory manner. The current state of allocated frequency bands shall be made publicly available except for detailed identification of frequencies allocated for specific government uses.

Note to the Specific Commitments in the Sectors
of Maritime Transport Services and Maritime Auxiliary Transport Services

Notwithstanding the fact that road, rail, inland waterways and related auxiliary services are not fully covered in this Schedule of Specific Commitments, a multimodal transport operator^(note 1) shall have the ability to rent or lease trucks, railway carriages or barges, and related equipment, for the purposes of inland forwarding of cargoes, or have access to, and use of, these forms of multimodal activities on reasonable and non-discriminatory terms and conditions^(note 2) for the purpose of carrying out multimodal transport operations.

(Note 1) "Multimodal transport operator" means the person on whose behalf the bill of lading, multimodal transport document or any other document evidencing a contract of multimodal carriage of goods is issued and who is responsible for the carriage of goods pursuant to the contract of carriage.

(Note 2) "Reasonable and non-discriminatory terms and conditions" means, for the purposes of multimodal transport operations, the ability of the multimodal transport operator to arrange for the conveyance of its merchandise on a timely basis, including priority over other merchandise which has entered the port at a later date.

Definitions

1. "Other forms of commercial presence for the supply of international maritime transport services" means the ability for international maritime transport service suppliers of Malaysia to undertake in the territory of Japan all activities which are necessary for the supply to their customers of a partially or fully integrated transport service, within which the maritime transport constitutes a substantial element. (This commitment shall however not be construed as limiting in any manner the specific commitments undertaken in respect of services supplied under subparagraph (v) (i) of Article 95.)

These activities include, but are not limited to:

- (a) marketing and sales of maritime transport and related services through direct contact with customers, from quotation to invoicing, these services being those operated or offered by the service supplier itself or by service suppliers with which

the service seller has established standing business arrangements;

- (b) the acquisition, on their own account or on behalf of their customers (and the resale to their customers) of any domestic transport and related services, including inward transport services by any mode, particularly inland waterways, road and rail, but excluding air, necessary for the supply of the integrated service;
- (c) the preparation of documentation concerning transport documents, customs documents, or other documents related to the origin and character of the goods transported;
- (d) the provision of business information by any means, including computerized information systems and electronic data interchange (subject to the provisions of the Annex on Telecommunications to the GATS);
- (e) the setting up of any business arrangements (including participation in the stock of a company) and the appointment of personnel recruited locally with any locally established shipping agency; and
- (f) acting on behalf of the companies, organising the call of the ship or taking over cargoes when required.

2. "Maritime cargo handling services" means activities exercised by stevedore companies, including terminal operators, but not including the direct activities of dockers, when this workforce is organised independently of the stevedoring or terminal operator companies. The activities covered include the organisation and supervision of:

- (a) the loading/discharging of cargo to/from a ship;
- (b) the lashing/unlashing of cargo; and
- (c) the reception/delivery and safekeeping of cargoes before shipment or after discharge.

3. "Container station and depot services" means activities consisting in storing containers, whether in port areas or inland, with a view to their stuffing/stripping, repairing and making them available for shipments.

4. "Maritime agency services" means activities consisting in representing, within a given geographic area, as an agent the business interests of one or more shipping lines or shipping companies, for the following purposes:

- (a) marketing and sales of maritime transport and related services, from quotation to invoicing, and issuance of bills of lading on behalf of the companies, acquisition and resale of the necessary related services, preparation of documentation, and provision of business information; and
- (b) acting on behalf of the companies organising the call of the ship or taking over cargoes when required.

5. "Maritime freight forwarding services" means an activity consisting of organising and monitoring shipment operations on behalf of shippers, through the acquisition of transport and related services, preparation of documentation and provision of business information. Maritime freight forwarding services include those provided by a person on whose behalf the bill of lading or any other document evidencing a contract of carriage of goods is issued and who is responsible for the carriage of goods pursuant to the contract of carriage.
